The
DANICO

*Catalogue of
Architectural Ironmongery*

**FIFTH
EDITION**

Welcome to the Danico Catalogue of Architectural Ironmongery

We are an independent family-owned company established in 1979 with over three generations of experience in the Architectural Ironmongery and Hardware Trade. Our showroom and head

office is based in Swiss Cottage, North London. We are able to advise and supply a complete range of Architectural Ironmongery sourced from all over the world, to offer you the widest possible choice of high quality, value for money, products.

Our clients include discerning home-owners, architects, builders, interior designers, hotels and corporations who are building new properties or refurbishing existing homes. We can supply any product anywhere in the world.

In this 100 page catalogue it has only been possible to show the majority of our standard range of products. Other items, sizes and finishes, are available to order. We also have the facilities to manufacture "special" items, made to client's specifications and designs.

Our catalogue has been colour-coded in separate sections, and a key to the abbreviated finish codes is shown on the contents page opposite.

On the last two pages we show a small selection of Decorative Grilles, Electrical Accessories, Jado Taps and Bathroom Accessories. Separate information is available on request.

Our experienced and friendly staff will be delighted to welcome you to our showroom or to help and advise you on the telephone.

We hope you find our catalogue informative and easy to use.

First published 1996.

Second edition 1998.

Third edition 2001.

Fourth Edition 2005.

Fifth Edition 2007.

CARE INSTRUCTIONS

All Danico Polished Brass products are protected by the most advanced lacquer available and under normal circumstances should give many years of service. We recommend occasional cleaning with a cloth moistened with soapy water. After cleaning apply a thin coat of good wax polish.

UNDER NO CIRCUMSTANCES USE ANY METAL POLISHES OR ABRASIVE CLEANERS.

It should be noted that the life of a lacquer coating is limited and will eventually break down. Adverse conditions (industrial pollution, sea air, acid rain, etc) or repeated continual handling may cause the coating to deteriorate prematurely. Should this occur, any trace of lacquer can be removed by the application of a paint stripper, or acetone (used according to the makers instructions), the item will then be unlacquered and in a suitable condition for cleaning with a metal polish.

EMERGENCY EXIT HARDWARE

Emergency Exit Hardware is designed to provide a means of escape at all times by the simple act of pushing a bar fitted across the full width of the door or depressing a pad attached to the operating body. Access from the outside is restricted for security purposes, but may be obtained by the addition of a lock attachment, which in no way interferes with escape, even when locked.

18.7372.85	Push Panic Bolt	SE
